DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, drawn to a knitted, woven or non-woven fabric, classified in class 8 , subclass 529.
- II. Claims 3-6, drawn to a continuous filament yarn having a core and a sheath, classified in class 442, various subclasses.
- III. Claims 7,8, drawn to a continuous filament yarn, classified in class 442, various subclasses.
- IV. Claims 9, 11, 13-16, drawn to a spun yarn that is a blend of polyester and disperse dyeable olefin , classified in class 428 and 442 , various subclasses.
- V. Claims 10 and 12, drawn to a spun yarn or fiber blend of nylon and disperse dyeable olefin, classified in class 442, various subclasses.
- VI. Claims 17 and 18, drawn to a melt blend fiber or filament yarn, classified in class 428 and 442, various subclasses.

The inventions are distinct, each from the other because of the following reasons:

All of the inventions are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct fibers or blends of fibers. For

Art Unit: 1751

example a blend of olefin and nylon is patentably distinct from a blend of olefin and polyester or from a blend of olefin/olefin as claimed since they have been formed from distinct polymeric materials. A sheath-core fiber is patentably distinct from a melt blend fiber since, being made by a different process they are expected to have different properties.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
